

MOSIAH AZUAJE

Senior Full-Stack & Cloud Engineer | Secure Application Architecture

Bogotá, Colombia (UTC-5) • +57 300 130 3406 • mosiahuazuaje2010@gmail.com
LinkedIn: mosiahuazuaje

PROFESSIONAL PROFILE

Senior Full-Stack Developer and Software Architect with 15+ years of experience designing, modernising, and operating production systems across frontend, backend, cloud, payments, and data layers. Over the last five years, focused on end-to-end architecture, API and microservice design, distributed systems, reliability, and secure software delivery. Hands-on with React/Next.js, Node.js/NestJS, Laravel/PHP, Azure, AWS, GCP, SQL databases, Redis, Docker, and CI/CD. Practical cybersecurity experience includes secure API design, authentication/authorisation, payment integrations, secrets-aware development, auditability, resilient transaction processing, and production monitoring.

CORE EXPERTISE

Architecture: Microservices, modular monoliths, REST APIs, event-driven systems, async processing	Cloud & DevOps: Azure, AWS, GCP, Docker, GitHub Actions, CI/CD
Backend: Node.js, NestJS, Laravel/PHP, Python	Application Security: JWT/API security, access control, secure integrations, input validation, audit logging
Frontend: React, Next.js, TypeScript, Vue.js, Angular	Payments & FinTech: Stripe, NOWPayments, payment workflows, webhooks/IPN, idempotency, transaction integrity
Data: MySQL, PostgreSQL, MongoDB, Redis	AI: LangChain, OpenAI APIs, embeddings, RAG workflows

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer / Software Architect | Vyrrium

2025 – Present • Remote

- Design and evolve React/Next.js and Node.js/NestJS services for customer-facing financial and investment workflows, with emphasis on maintainability, scalability, and production reliability.
- Implemented and supported payment integrations with Stripe and NOWPayments, including payment-status handling, webhook/IPN processing, transaction traceability, and resilient failure handling.
- Applied secure engineering practices around payment flows: server-side validation, controlled API access, secrets/configuration separation, idempotent transaction handling, and auditable operational logging.
- Designed asynchronous and event-driven workflows, relational data models, and service boundaries for billing, customer plans, transaction cycles, and platform operations.
- Contributed to cloud-native delivery, API integration, incident troubleshooting, and production hardening across distributed services.

Technologies: React, Next.js, TypeScript, Node.js, NestJS, PostgreSQL/MySQL, Redis, Docker, Stripe, NOWPayments, REST APIs

Full-Stack Developer / Architect | Taller Technologies

Aug 2024 – Present • USA / Remote

- Own end-to-end architecture and delivery across frontend, backend, databases, and Azure cloud infrastructure for production applications, including SAM and 3CMD-related project work.
- Applied application-security principles in SAM/3CMD environments: secure API design, authentication/authorisation controls, input validation, protected configuration/secrets, least-privilege-oriented integrations, logging, and operational traceability.
- Designed scalable APIs and backend services with strong data-integrity controls; implemented asynchronous processing with Azure WebJobs and Functions.
- Improved performance by approximately 30% through Redis caching and database optimisation, while using retry strategies and idempotent operations to increase resilience.
- Designed and maintained CI/CD pipelines and monitored production reliability across Azure App Services, Storage, MySQL/PostgreSQL, and Redis.

Technologies: Laravel, Vue.js, PHP, JavaScript, MySQL, PostgreSQL, Redis, Azure App Services, Storage, WebJobs, Functions, Docker, GitHub Actions, Tailwind CSS

PROFESSIONAL EXPERIENCE — CONTINUED

Full-Stack Developer | Curotec

Oct 2023 – Aug 2024 • USA / Remote

- Built production frontend and backend features using Laravel, Livewire, Blade, Next.js, and TypeScript, translating Figma designs into maintainable components.
- Developed PHPUnit tests and backend/API integrations; improved rendering and application performance through SSR/SSG and frontend optimisation.
- Deployed and optimised applications on AWS using S3, ECR, App Runner, and Docker-based CI/CD workflows.

Technologies: Laravel, Livewire, Blade, Next.js, TypeScript, Docker, MySQL, OpenSearch, AWS S3/ECR/App Runner

Full-Stack Developer (Freelance) | CaboSafeRide

Aug 2023 – Present • San José del Cabo, Mexico / Remote

- Designed, developed, and maintain a multi-tenant transportation operations platform using Laravel and modern JavaScript frameworks, supporting booking, dispatch, reporting, and external-company workflows.
- Built REST APIs with JWT authentication and role-aware access patterns, strengthening separation between tenants and external integrations.
- Integrated and operated customer payment workflows with Stripe, applying server-side validation, webhook processing, transaction-status checks, audit logging, and safe handling of payment state changes.
- Reduced driver quota-assignment time by approximately 90% and introduced real-time operational updates for scheduling and last-minute changes.
- Designed asynchronous queue-based workflows and migrated infrastructure from Laravel Vapor to Vultr for improved operational control.

Technologies: Laravel, React, Vue.js, JWT, Stripe, Redis/Queues, MySQL, Laravel Vapor, AWS, Vultr, Linux, Docker, Tailwind CSS

Full-Stack Developer (Freelance) | Gestimedical

Nov 2019 – Present • Bogotá, Colombia

- Led the complete software lifecycle as sole developer, from requirements and data modelling through frontend/backend implementation, deployment, and production support.
- Migrated the solution to Google Cloud Platform, reducing annual on-site server costs by 50%, and automated invoicing workflows that reduced invoice-generation errors by approximately 50%.
- Built Angular/TypeScript frontend applications and Laravel APIs with scalable relational data structures and production-oriented architecture.

Technologies: GCP, Laravel, REST APIs, Angular, TypeScript, MySQL, Vue.js, React, Redux, Linux

Backend Developer | NIVELICS

Jun 2020 – Jul 2020 • Bogotá, Colombia

- Created and tested REST endpoints for frontend integration and supported integration testing to eliminate delivery defects.

Technologies: Symfony, Laravel, REST APIs, MySQL, Scrum

Full-Stack Developer | Lupatech

Sep 2019 – Mar 2020 • Bogotá, Colombia

- Developed Node.js endpoints and the Angular frontend for business applications; supported testing and production-quality integration.

Technologies: MongoDB, Express, Angular, Node.js, AWS, Jira, Scrum

EARLIER EXPERIENCE

Team Lead / Full-Stack Developer | Petroalianza

Apr 2016 – Aug 2019 • Tía Juana, Venezuela

- Led development planning and follow-up for ERP modules, designed database structures, and administered source repositories and deployment servers.

Technologies: PHP, CakePHP, MySQL, Linux, AngularJS, jQuery, Bootstrap, Scrum

Full-Stack Developer | Hospital El Rosario

Apr 2006 – Mar 2016 • Cabimas, Venezuela

- Developed and maintained ERP modules, database structures, internal PHP/MySQL systems, and a WordPress website integrated with appointment-booking endpoints.

Technologies: PHP, MySQL, PostgreSQL, CakePHP, JavaScript, jQuery, WordPress, Bootstrap

SECURITY & SECURE ENGINEERING FOCUS

- Application security: secure-by-design APIs, authentication/authorisation, JWT, access control, validation, secure error handling, and tenant isolation.
- Payment security: Stripe and NOWPayments integrations, webhook/IPN validation patterns, idempotency, transaction integrity, auditability, and controlled payment-state transitions.
- Cloud security practices: environment-based configuration, secrets separation, least-privilege-oriented access, CI/CD controls, logging, monitoring, and incident troubleshooting.
- Resilience as a security/reliability control: retries, asynchronous processing, fault isolation, database consistency, and defensive handling of external-service failures.

EDUCATION

T.S.U. in Informatics — Instituto de Tecnología READIC UNIR, 2003–2006

LANGUAGES

Spanish: Native • **English:** B2 Upper-Intermediate

ADDITIONAL INFORMATION

Open to opportunities in Switzerland and international/remote environments. Work permit / relocation status can be provided according to the role and canton.
